

GAURAV SINHA

Dynamics 365 & Power Platform Professional

+91-9163969172 | sinhagaurav.101.gs@gmail.com | [linkedin.com/in/gauravsinha](https://www.linkedin.com/in/gauravsinha) | Kolkata, India

PROFESSIONAL SUMMARY

Microsoft Dynamics 365 and Power Platform professional, Microsoft Certified: Power Platform Fundamentals (PL-900), with experience supporting Dynamics 365 Sales implementations, Power Platform solutions, Dataverse configuration, JavaScript customizations, Power Automate workflows and solution deployments. Backed by 5+ years of overall enterprise IT experience with a strong foundation in VMware virtualization and administration, Windows infrastructure and PowerShell automation, I combine technical expertise with business-focused problem solving to deliver scalable, reliable and client-centric Microsoft solutions.

SKILLS

- **Microsoft Business Applications** : Dynamics 365, Microsoft Power Platform, Power Apps (Model-Driven), Power Automate, Microsoft Dataverse
- **Dynamics 365 Development** : JavaScript, C# Plugins, Business Rules, Form & View Customization, Security Roles, Solution Management, Plugin Registration Tool, XRM Toolbox
- **Automation & Scripting** : PowerShell, PowerCLI, AI-Assisted Development
- **Enterprise Technologies** : VMware vSphere, VMWare vCenter, ESXi, Dell OME, HP OneView, Windows Server Administration, Vendor Management, ServiceNow, Solarwinds, Splunk, ITIL

WORK EXPERIENCE

Senior Analyst | Capgemini India

Oct 2022 – Aug 2026

Microsoft Dynamics 365 & Power Platform

- Developed an Employee Leave Management solution using Model-Driven Power Apps, Dataverse and Power Automate, enabling employees to submit requests, managers to approve/reject them with automated email/Teams notifications and leave-status tracking - digitizing the end-to-end leave process.
- Developed a Company Registration & Renewal solution using Model-Driven Power Apps and Dataverse, automating application processing, document capture, approval, registration-number generation and one-year registration validity tracking, reducing manual administrative effort and improving registration data accuracy.
- Configured Dynamics 365 Sales / Model-Driven Apps including forms, views, business rules, security roles, custom fields, relationships and role-based access to align solutions with client business requirements.
- Designed Microsoft Dataverse data models using custom tables, relationships, lookups and choice fields to support business processes beyond standard Dynamics 365 functionality.
- Built Power Automate cloud flows for approval workflows, record updates, custom auto-number generation, notifications, scheduled processes and Outlook/Teams integration, reducing manual intervention and improving process turnaround.
- Developed JavaScript client-side customizations using OnLoad, OnChange and OnSave for field validation, auto-population, date validation, dynamic controls and enhanced user experience.
- Implemented C# plugins for duplicate validation, automated record updates during Create/Update operations and supporting server-side business logic and data integrity.
- Managed Dynamics 365 / Power Platform ALM using managed and unmanaged solutions, including solution configuration, import and export, environment migration, deployment, UAT, defect resolution and post-go-live support.
- Collaborated with functional consultants and business stakeholders to translate requirements into scalable technical solutions, troubleshoot issues and deliver enhancements across the application lifecycle.

Enterprise Infrastructure & Virtualization

- Led VMware ESXi 8.0 upgrades across production clusters with zero critical downtime while managing VMware vSphere environments, Windows Server, Active Directory and enterprise virtualization infrastructure.
- Automated virtual machine provisioning and operational workflows using PowerShell and PowerCLI, reducing manual effort by 40% and improving deployment consistency.
- Managed ESXi host lifecycle operations, including patch management, firmware upgrades, vulnerability remediation, capacity planning, backup and recovery and disaster recovery readiness, sustaining 99.9% infrastructure availability.
- Resolved critical P1/P2/P3 incidents, performed root cause analysis and drove ITIL-based Change, Incident and Problem Management using ServiceNow to improve operational efficiency.

Analyst | Capgemini India

Jan 2021 – Sep 2022

Enterprise Infrastructure & Virtualization

- Provisioned and deployed 100+ enterprise virtual machines using standardized templates, reducing deployment time by 50% while ensuring configuration consistency.
- Managed the complete virtual machine lifecycle, including provisioning, snapshots, backups, recovery, decommissioning and resource allocation across VMware environments.
- Monitored and optimized VMware infrastructure performance, improving CPU, memory and storage utilization while maintaining platform stability and availability.
- Resolved virtualization-related incidents involving provisioning, performance, resource contention and access issues, consistently meeting SLA targets through root cause analysis.
- Collaborated with cross-functional teams to support production deployments, develop infrastructure utilization reports and drive capacity planning and continuous service improvements.

CERTIFICATIONS

- **Microsoft Business Applications** : Microsoft Certified: Power Platform Fundamentals (PL-900)
- **McKinsey Forward Program** : Developed practical skills in structured problem-solving, communication, leadership, adaptability, resilience, and digital productivity for the future of work.
- **VMware & Virtualization** : Administration in vSphere 8 (Udemy), VMware Data Center Virtualization Foundations (Coursera), VCP-DCV Foundation & vSphere 8.x Architecture (Coursera)
- **Project Management & Methodologies** : Agile Software Development (Coursera), Project Management (Google), Lean Six Sigma (Simplilearn), Lean Six Sigma White Belt (Coursera).
- **Leadership** : Leadership Skills (IIM Ahmedabad)
- **Generative AI** : Introduction to Generative AI (Google), Complete Prompt Engineering for AI Bootcamp (Udemy)
- **Sustainability** : Introduction to Greenhouse Gas Accounting for IT (Cisco)

AWARDS & RECOGNITIONS

- **GOAT Award** : Recognized for remediating critical infrastructure vulnerabilities across multiple remote sites through cross-functional collaboration.
- **Employee of the Month** : Awarded for executing ESXi patching, BIOS, and firmware upgrades with zero production downtime.
- **Certificate of Excellence** : Recognized for outstanding execution of VMware infrastructure operations and service delivery.
- **Client Appreciation** : Received multiple client recognitions for successfully delivering MES IT downtime activities and infrastructure maintenance.
